Servo Amps // Stepper Controllers // Process Controllers // I/O Modules

WE REPAIR ALL MAKES AND MODELS

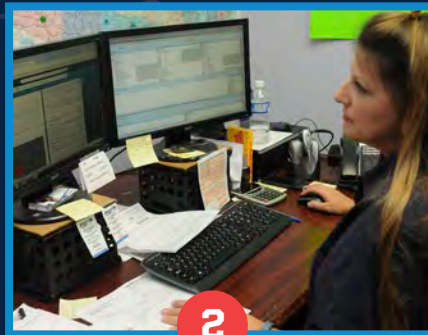

REPAIRS DONE RIGHT

WE EVALUATE AND REPAIR THOUSANDS OF PARTS EACH YEAR. SAVE MONEY BY EXTENDING THE LIFE OF YOUR COMPONENTS.

SIX DECADES OF QUALITY REPAIRS

Your part arrives at our Houston-based repair depot. At Innovative-IDM, the IDM stands for Industrial Drive Maintenance.

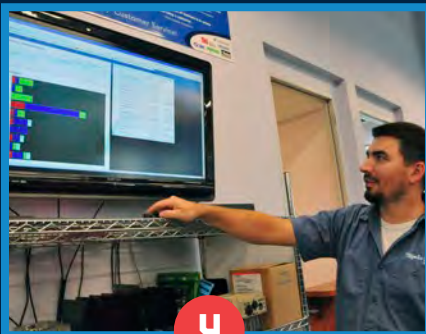

SATISFACTION GUARANTEED

We have a full team of techs and customer service experts. Your part is received, logged and you are notified your item has safely arrived.

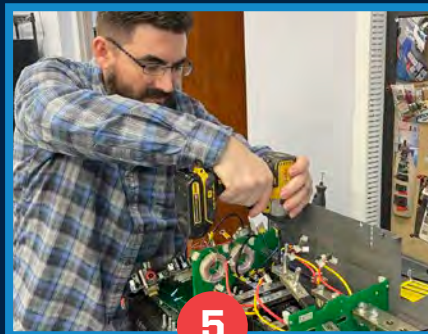

NO EVALUATION FEE – WE QUOTE & YOU DECIDE

Your part is assigned a job number, tagged for identification and assigned for evaluation. For urgent matters, we can move your part to the head of the line for a fee.

QUALITY CONTROL ASSURANCE

All repair jobs are tracked to assure quality control and timely turnaround.

WE EVALUATE AND RECOMMEND NEXT STEPS

Your part is evaluated by a certified technician. In most cases the part is repairable. You will receive a written quote for you to approve before we begin work. If the part is not repairable, we can assist with a replacement or retrofit.

WE PERFORM THE WORK

Once you've approved the estimate, our technicians do the rest. Your part is carefully packed in custom-formed foam and ready to ship. There is a 1-year warranty on all repairs.
